

Editor's Comment:

I have some comments:

- 1.- What was the sampling method used?
- 2.- What was the sample size calculation?
- 3.- What was the study design: cohort, experimental?
- 4.- What were the predictive values?
- 5.- In the manuscript write "patients". It is a mistake, they are subjects or participants. The research is not a medical act.
- 6.- What Bioethics Committee approved the study?

Editor's Details:
