

| EDITORIAL COMMENT'S on revised paper (if any) | Authors' response to editor's comments |
|---|--|
| 1- What was the sampling method used? | Convenient sampling |
| 2- What was the sample size calculation? | Fifty patients were included without using any specific formula for calculation |
| 3- What was the study design: cohort, experimental? | Ambidirectional case-series |
| 4- What were the predictive values? | Sensitivity and specificity of CT-scan imaging in diagnosis of anatomical abnormalities in comparison to Endoscopic Sinus Surgery |
| 5- In the manuscript write "patients". It is a mistake, they are subjects or participants. The research is not a medical act. | The study included patients have had signs and symptoms of chronic rhinosinusitis |
| 6,. What Bioethics Committee approved the study? | Verbal consent was taken from each patient involved in the study and the administrative agreement of Department of Otorhinolaryngology in Sulyaimania Teaching Hospital, |
