Manuscript Title: The vicious cycle of BRASH syndrome: A case report and a brief review of literature

Journal Name: Asian Journal of Research in Cardiovascular Diseases

A case Report.

I have gone through the comments of the reviewers as well as the manuscript.

I have few comments that may be important for the journal in the long run.

Comments:

1. It would be relevant to mention the drug dosage used for managing Hyperkalaemia (the protocol followed).

2. The type of transvenous pacemaker : generator (Make to be mentioned).

The case report is important and interesting especially for the physicians and the nephrologist who manage patients with renal failure. BRASH syndrome is an interesting clinical entity where the clinicians have lot of challenges to face.

The decision for this case report is : Accepted.
