

Review Form 1.7

Journal Name:	South Asian Journal of Social Studies and Economics
Manuscript Number:	Ms_SAJSSSE_105412
Title of the Manuscript:	DEMOGRAPHIC DYNAMICS AND HEALTH CARE EXPENDITURE IN MALAPPURAM DISTRICT
Type of the Article	Original Research Article

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1. This manuscript is quite informative for the scientific community</p> <p>2. the title of this article is unclear in the form of research (qualitative or quantitative)</p> <p>3. In general, the abstract is in accordance with the results of the discussion, but it is necessary to clarify the form of the research</p> <p>4. Are the subsections and structure not appropriate because there is no clarity regarding the form of research</p> <p>5. The manuscript is correct, but there is no compatibility between the title and data analysis due to a lack of theory in determining the variables to be measured qualitatively</p> <p>6. the references are inadequate and must be supplemented with several theoretical references with clear measuring variables that link between variable X (independent) and variable Y (dependent) and there are other variables, namely the epsilon variable to determine the magnitude of the influence relationship X to Y and epsilon to Y</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>This languages (English) are suitable for scholarly communications</p>	
<p>Optional/General comments</p>	<p>This article actually explains the influence of relationships between demographic factors and health expenditure patterns through quantitative research, but the title is qualitative research, thus it is suggested that you should use several theories in determining variables and indicators so that the results can be measured through the relationships between variables and their effects. Thus, it is necessary to add several relevant theoretical recommendations that have measuring variables for the problems faced (state of the arts)</p>
