

Review Form 1.7

Magazine name:	International Journal of Plant and Soil Sciences
Manuscript number:	Ms_IJPSS_106459
Manuscript title:	Response of different moisture regimes and nitrogen sources on soil health, growth and yield attributes of wheat: a comprehensive review
Item type	

Review Form 1.7

PART 1: Review comments

	reviewer comment	Author's Comment (If you agree with the reviewer, please correct the manuscript and highlight that part in the manuscript. It is mandatory for authors to write their comments here)
<p>Mandatory REVIEW Comments</p> <p>1. Is the manuscript important to the scientific community? (Please write a few sentences about this manuscript)</p> <p>2. Is the title of the article appropriate? (If not, please suggest an alternative title)</p> <p>3. Is the article summary complete?</p> <p>4. Are the subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestions for additional references, please mention them in the review form.</p> <p><u>(Apart from the 6 points mentioned above, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1. The manuscript presents: The key words must be worked with the UNESCO THESAURUS that allows the study to be located within a specific spectrum of sciences: Agriculture – Soil – Wheat... This article corresponds to a bibliographic review writing that is: Document resulting from a completed investigation where the results of published or unpublished research on a field in science or technology are analyzed, systematized and integrated, in order to account for advances and development trends..It is characterized by presenting a careful bibliographic review of at least 50 references. With this observation it can be mentioned that it meets the requirement established for this type of academic articles. The problem posed and its context are clear. The different studies carried out over time on the irrigation program, the importance of soil, water. the yield... reveals an evolutionary contribution that favors the growth and production of wheat and those who dedicate themselves to this type of crop. It is recommended to review the citation form, which is incomplete. Since there is no objective of the research, its conclusions cannot be evaluated.</p> <p>2. The title responds to the approach of the research. 3. It is necessary that the objective of the study be mentioned; the proposed methodology is weak; There are no results or conclusions. Review this section that summarizes all the research carried out. 4. For this type of article, "Bibliographic review" is relevant even though one section is incomplete. 5. The manuscript is a scientific documentary review. 6. There are few updated references. Complies with the requirement established for this type of writing.</p>	
<p>Minor REVIEW Comments</p> <p>1. Is the language/English quality of the article suitable for academic communications?</p>	<p>Linguistic refinement is recommended</p>	
<p>Optional/General comments</p>	<p>PLEASE FOLLOW THE JOURNAL GUIDELINES.</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
