

Editor's Comment:

Thank you for requesting my opinion. I carefully checked the revised manuscript, together with the reviewer reports and answer, and I have the following comments:

There were few improvements to the manuscript, highlighted in yellow, which partially met the reviewers' requests, but some queries of reviewer "Nab" were not met and the authors had actually rough answers.

Thus, I recommend either to reject the paper on account of not having deliberately improved the paper as requested, or allow the authors a 2nd opportunity to improve the paper. Queries 3, 4, 5 and 6 of the reviewer "Nab" were not met. For query 3, I agree that adding error bars is not a good idea, but I would definitely ask the authors to duly implement queries 4, 5 and 6.
