

**Review Form 1.7**

|                          |  |
|--------------------------|--|
| Journal Name:            | Asian Journal of Immunology  |
| Manuscript Number:       | Ms_AJI_106608  |
| Title of the Manuscript: | Contribution of the Leukocyte Adherence Inhibition Test to the Diagnosis of Innate Non-IgE-mediated Immunoreactivity against <i>Saccharomyces cerevisiae</i> . |
| Type of the Article      | Original Research Article  |

**PART 1: Review Comments**

|  | Reviewer's comment   | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|--|--|---|
| <p><b>Compulsory</b> REVISION comments</p> <p>1. Is the manuscript important for scientific community?<br/>(Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable?<br/>(If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p> | <p>The manuscript is important for the scientific community and I recommend being published in your journal even if some areas are still to be improved.</p> <p>Yes.</p> <p>The abstract is comprehensive providing important data concerning the content of the article.</p> <p>Yes. I would recommend emphasizing on the "Discussions" section.</p> <p>Yes.</p> <p>The number of references is sufficient and relatively recent.</p>   |   |
| <p><b>Minor</b> REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>  | <p>This part should be revised by a native speaker as there are some sentences that need to be rephrased.</p> <p>This is one example: "To evaluate the potential of the Leukocyte Adherence Inhibition Test (LAIT) to evaluate non-IgE-mediated innate immunoreactivity against <i>Saccharomyces cerevisiae</i> in patients with clinical suspicion of allergic reaction to fungal allergens."</p> <p>This is another one: "Further studies discovered that <b>these</b> (<i>it might be removed</i>) same Th2 cytokines also influenced a particular group of innate immune cells that respond to their presence, amplifying their influence; these cells were denominated type 2 Innate Lymphoid Cells (ILC2s) [57]. The main <b>stimulus</b> to activate the ILC2s <b>are</b> (<i>stimulus...is or stimuli are</i>) the alarmins, cytokines activated by microbial activity near the mucosal borders or released by damaged epithelium [58]."</p> |   |
| <p><b>Optional/General</b> comments</p>  |  |   |

**PART 2:**

|   | Reviewer's comment   | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|---|--|---|
| <p>Are there ethical issues in this manuscript?</p> | <p>(If yes, Kindly please write down the ethical issues here in details)</p> |   |
