<p><b>Minor</b> REVISION comments</p> <p>1. <b>Is language/English quality of the article suitable for scholarly communications?</b></p>	<p>good</p>	
<p><b>Optional/General</b> comments</p>	<p>Although the study provides a novel and intriguing way for enhancing optimal trading strategy, it may be more logically structured. Rearranging the manuscript into discrete sections like Introduction, Methodology, Experimental Setup, Results and Discussion, and Conclusion can help it flow better. The theoretical foundations, algorithmic details, experimental findings, and overall contributions would be easier to understand for readers thanks to this approach, which would also make it simpler for readers to follow the research's logical progression.</p> <p>If the introduction provided a brief description of the significance of Multirepresentation-Based Physics Modules Implemented to Enhance Students' Critical Thinking Skills, the work would be more approachable to a wider audience.</p>
