

Review Form 1.7

Journal Name:	Journal of Advances in Medicine and Medical Research
Manuscript Number:	Ms_JAMMR_114240
Title of the Manuscript:	SPIN ANALYSIS IN RANDOMIZED CLINICAL TRIALS OF PHYSIOTHERAPEUTIC TREATMENT FOR TEMPOROMANDIBULAR DISORDERS: A SYSTEMATIC REVIEW PROTOCOL.
Type of the Article	Study Protocol

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Yes. This study would create an information for systematic review protocol.</p> <p>As per the present manuscript the title is suitable, however the title can be amended based on the updated version of manuscript.</p> <p>Partially yes. The abstract can be enhanced further. It requires some more precise information as commented in the manuscript.</p> <p>Partially yes. Can consider to include some illustrations/flow chart.</p> <p>Need improvement. Especially appraisal tool and SPIN analysis are two different contexts.</p> <p>Need improvement. Please include previous similar studies on these topics and research gaps.</p> <p>The author(s) is/are requested to consider the following points. The author is conducting a SPIN analysis of RCT published. These RCT are selected based on systematic review. These two are two different contexts. Either author can consider a systematic review protocol for Physiotherapeutic management of clients with TMD or SPIN analysis of RCT published on Physiotherapy management on clients with TMD. Both are two different topics</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Need improvement in certain sections.</p>	
<p>Optional/General comments</p>	<p>Need discussion with research team or experts in systematic review. Please refer the above section.</p>
