

**Editor's Comment:**

Despite two positive reviews, I have a few comments about the manuscript:

1. Fig. 1 should be signed as Fig. 1, what does the white box with a red border mean?
2. the subsequent figures are also unnumbered,
3. in the results section, the authors included only two tables without any comments, maybe there is no point in separating the discussion section and presenting the whole thing as "results and discussion",
4. subsequent figures are unnumbered, the titles of the figures should be placed below the figures.
