Review Form 1.7

PART 1: Review Comments

| | Reviewer's comment | Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i> |
|---|--|---|
| <p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p> | <p>The manuscript is important for the scientific community as it delves into the significant issue of intentional self-organophosphate poisoning among young individuals in Kericho County, Kenya. By exploring the influence of family factors on such behaviors, the study provides valuable insights that can inform public health interventions and preventive strategies in similar settings.</p> <p>The title of the article is suitable as it clearly reflects the focus of the study.</p> <p>The abstract of the article is comprehensive, summarizing the study's objectives, methodology and key findings related to the impact of family dynamics on intentional self-poisoning behaviors among young individuals in the specified region</p> <p>The subsections and structure of the manuscript are appropriately organized, guiding readers through the research process from the background information to the methodology, results and conclusions in a logical sequence</p> <p>The manuscript demonstrates scientific correctness in its approach to data collection, analysis and interpretation, ensuring the reliability and validity of the study findings</p> <p>While the references provided are relevant and recent, it may be beneficial to consider incorporating additional references that discuss the broader implications of family influences on mental health and substance abuse among youth</p> | |
| <p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p> | <p>The language and English quality of the article are suitable for scholarly communication, maintaining clarity and coherence throughout the manuscript. A few grammatical errors, punctuation to be taken care by the Author(s)</p> | |

Review Form 1.7

| | | |
|----------------------------------|---|--|
| Optional/General comments | The study's focus on family factors influencing intentional self-poisoning behaviors among young individuals in Kericho County is commendable. The thorough methodology, clear presentation of results and implications for public health interventions make this manuscript a valuable contribution to the field | |
