

Review Form 1.7

Journal Name:	Journal of Advances in Microbiology
Manuscript Number:	Ms_JAMB_115197
Title of the Manuscript:	Trichoderma spp. isolates from agriculture field identified internal transcribed spacers (ITS), with chitinase activity and biocontrol activity against Fusarium spp.
Type of the Article	Research

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>The manuscripts play a crucial role in sharing research, fostering collaboration, and advancing science. This study highlights the potential of Trichoderma isolates for biocontrol against Fusarium and sheds light on their chitinolytic capabilities. Further research could lead to valuable application in agriculture</p> <p>The current title is informative but could benefit from a touch of creativity. However, it could be made more attractive by incorporating a phrasing or question that can engaged the reader e.g. "Harnessing Trichoderma: Biocontrol against Fusarium Species"</p> <p>The abstract provides essential information but could benefit from further clarity, conciseness and explicit details regarding contributions</p> <p>A well-structured manuscript with clear subsections enhances readability and effectively communicate research findings to the scientific community</p> <p>Yes, based on some criteria commonly used by reviewers such as relevance and originality, clarity and writing quality, data presentation and scientific reasoning.</p> <p>The reference provided cover a range to topics related to Trichoderma, fungal diseases and biological control</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>The language and English quality seem suitable for scholarly communication.</p>	
<p>Optional/General comments</p>
