

Review Form 1.7

Journal Name:	Advances in Research
Manuscript Number:	Ms_AIR_115412
Title of the Manuscript:	First report of Alaria spp. in domestic feline in southern Brazil
Type of the Article	Case report

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Please find the attached comments below</p>	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> 1. Is language/English quality of the article suitable for scholarly communications? 	<p>"English quality in the manuscript needs improvement."</p>	
<p>Optional/General comments</p>	<p>First detection of Alaria spp. in domestic felines in southern Brazil</p> <p>Reviewer: I respectfully suggest several improvements to enhance the clarity and readability of the manuscript. Please see specific comments below, marked sequentially, to refine the manuscript and align it with accepted standards.</p> <p>Abstract: Emphasize the key findings of the study, including background information, research objectives, methodology, results, conclusions, and recommendations. Keywords: Choose the most relevant keywords from the abstract.</p> <p>Introduction: Provide a concise summary of global knowledge regarding Alaria Spp. in domestic cats, focusing on information relevant to Brazil. Discuss the potential zoonotic transmission of Alaria spp. and provide evidence of transmission from animals to humans. Justify why reports of Alaria spp. in domestic cats are predominantly from southern Brazil. Clearly state the purpose and objectives of the case report.</p> <p>Presentation of Case: Present the case in a clear and engaging format that is easy for readers to understand.</p> <p>Discussion: Revise the discussion section, comparing the study's findings with previous research conducted worldwide. Provide logical explanations to aid in understanding the manuscript. Address any limitations of the study. Conclude the discussion with practical recommendations for implementing the study's findings, rather than offering theoretical suggestions. Address potential barriers to detecting Alaria spp. in domestic cats in southern Brazil.</p>
