

Editor's Comment:

After careful review of both the original and revised versions of the manuscript, as well as the reviewers' comments, it is evident that their contributions greatly benefited the study and improved the overall quality of the manuscript. The authors adeptly integrated the reviewers' recommendations, resulting in a manuscript that is more coherent, thorough, and suitable for publication in the journal.

Although there were a few minor problems with formatting, citation checking and linguistic refinement, the manuscript proves to be technically sound and comprehensive. In my view, it addresses a relevant topic and promises to make significant contributions to the existing literature.
