

Editor's Comment:

I reviewed the files sent by you, regarding the Work JERR 115563, titled "The Method of the Probability Analysis of Area with Dissolved gases in Power Transformer Insulating Oil". I consider that the authors have made satisfactorily the corrections requested by the referees. However, I think a better title would be "A Novel Probabilistic Analysis Method for Monitoring Dissolved Gases in Power Transformer Insulating Oil", as was suggested by one of the referees. The authors should consider changing it. If the authors insist that the original title they propose is better, then let the original title remain.

I consider that the article can be published.
