Title of the Manuscript:	UNDER ENVIRONMENTAL STRESS INCREASE CO2 LEVEL AND THE PHOTOSYNTHETIC RESPONSE OF PLANT
Type of the Article	

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>With respect to the erratic climatic conditions and global warming on the rise, the concept and idea of the manuscript holds importance for the scientific community.</p> <p>Title is okay but should be more generalised since several plant physiological aspects have been discussed besides much emphasis on photosynthetic process. My suggested title would be "Photosynthetic and other physiological response of plant towards increased CO₂ level under environmental stress"</p> <p>okay</p> <p>okay</p> <p>yes</p> <p>References okay. But some cited references of text are missing from reference list. Please check and include in the reference list. This is a gross mistake. Also include latest references of past 3-4 years (from 2020-2023 minimum and latest of 2024 if available which I am sure should be)</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	Overall okay	
<p>Optional/General comments</p>	Please do the necessary corrections to improve the quality of the manuscript for publication.
