

Review Form 1.7

Journal Name:	Asian Journal of Pediatric Research
Manuscript Number:	Ms_AJPR_114843
Title of the Manuscript:	The Role of Fibroblast Growth Factor-Receptor Pathway Aberrations in Pediatric Diseases
Type of the Article	Minireview Article

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<ol style="list-style-type: none"> 1. Yes, this publication will help with future research and therapy by offering vital insights into the function of abnormalities in the FGF receptor pathway in pediatric illnesses. 2. The title effectively captures the focus on FGF receptor pathway aberrations in pediatric diseases. No alternative title is suggested. 3. The abstract provides a comprehensive overview of the role of fibroblast growth factor receptors (FGFRs) in pediatric diseases. However, it could be improved by specifying the types of pediatric cancers and congenital disorders affected by aberrant FGF signaling. Additionally, mentioning specific rare diseases would enhance clarity. 4. The abstract provides a comprehensive overview, but could include specific findings and recent advancements for enhanced clarity and relevance. The manuscript seems scientifically accurate overall. However, adding more empirical evidence and clarifying certain points could strengthen its scientific validity. 5. Including some more recent studies could enhance the comprehensiveness of the review. 	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Here are a few suggestions to address spelling, comma, and grammatical issues:</p> <ol style="list-style-type: none"> 1. Review the text for spelling errors and correct them using a spell checker or proofreading tool. 2. Check for proper comma usage, especially in compound sentences and lists, to ensure clarity and coherence. 3. Pay attention to grammatical errors such as subject-verb agreement, tense consistency, and sentence structure to enhance readability and accuracy. 	
<p>Optional/General comments</p>	<p>Overall, this comprehensive review provides valuable information on the molecular mechanisms and clinical significance of the FGF receptor pathway in pediatric diseases, offering a foundation for future research and therapeutic interventions in this field.</p>
