(If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>Yes</p> <p>Yes</p> <p>No</p> <p>No</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Yes</p>	
<p>Optional/General comments</p>	<p>We appreciate the work of the authors on this manuscript and the results obtained. Still, unfortunately, the general context was not adopted in writing the manuscripts and how to discuss the results in general.</p> <p>Weaknesses:</p> <p>1- The introduction is very brief and does not contain sources.</p> <p>2- The practical part is completely devoid of materials and devices used, and too we do not see spectroscopic analysis to prove the structures of the prepared compounds.</p> <p>3- The results and discussion part: It is completely unacceptable, as there is no general diagram that explains the steps for preparing new compounds.</p> <p>4- The method of writing references is very naive.</p>
