

Review Form 1.7

| | |
|--------------------------|---|
| Journal Name: | Asian Journal of Food Research and Nutrition |
| Manuscript Number: | Ms_AJFRN_115763 |
| Title of the Manuscript: | Effects of Pre-treatments and Drying Methods on Cyanide and Functional Properties of Cassava (<i>Manihot esculenta</i> Crantz) Flour |
| Type of the Article | |

PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|--|---|---|
| <p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p> | <p>1. YES. As mentioned in the author's title, Cassava Flour obtains different results through different pre-treatment methods and drying methods through data comparison.</p> <p>2. Suitable.</p> <p>3. The abstract can broadly describe the causes and consequences, allowing readers to understand the final research findings.</p> <p>4. Subsections and structure of the manuscript are appropriate. The detailed research process is also described through the experimental design method, but suggestions for industrial application should be described in the conclusion section.</p> <p>5. If the data provided by the author is correct, it can strengthen the explanation of the growth or harvest status of cassava in 2022 and 2023, whether it is affected by the environment (growth temperature, fertilizer, or humidity) and the explanation of the difference between the two.</p> <p>(Source of Cassava Root :Cassava variety (TME-419) was obtained from the National Root Crops Research Institute (NRCRI), Nyanya sub-station, for experimental purposes in the 2022 and 2023 growing seasons.)</p> <p>6. Fair.</p> | |
| <p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p> | Acceptable | |
| <p>Optional/General comments</p> | It is recommended to add laboratory instrument data graphs or tables to present the differences. | |

PART 2:

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|--|--|---|
| Are there ethical issues in this manuscript? | <i>(If yes, Kindly please write down the ethical issues here in details)</i> | |
