

Review Form 1.7

Journal Name:	Asian Journal of Medicine and Health
Manuscript Number:	Ms_AJMAH_115996
Title of the Manuscript:	AMELIORATIVE HISTOLOGICAL EFFECT OF AQUEOUS NEEM LEAF EXTRACT ((Azadirachta indica) ON LEAD INDUCED NEUROTOXICITY OF LATERAL GENICULATE BODY OF ADULT WISTAR RATS.
Type of the Article	Research article

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1. Yes, this manuscript is important for scientific community</p> <p>2. Yes, this title is suitable for article</p> <p>3. Yes, the abstract of the article is comprehensive</p> <p>4. Yes, the subsections and structure of this manuscript is appropriate.</p> <p>5. yes, this manuscript is scientific base for the research on lead toxicity</p> <p>6. The references were given in the manuscript is sufficient .</p> <p>The given article was reviewed. The conceptualization of this research article is nice. Review comments: 1. Hypothesis and materialistic methods were clearly explained. 2. They explained very clear about the impact of lead toxicity in the lateral geniculate bodies. 3. In-depth analysis of this article, highlights some remarks here are follows, a) There is no values are tabulated for graphical representation b) In grouping of animals. the purpose of group 3 was not clearly understood due to it receive only 200mg/kg of neem leaf extract. c) There is no grouping of animal with reference standard. d) They should not endorse the level of lead toxicity in LGB(toxic level). After rectification above mentioned issues, I strongly recommend to this article for publish.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Yes, language quality of this article is suitable for scholarly communications.</p>	
<p>Optional/General comments</p>	-
