PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>The paper "Economic assessment of different varieties of sweet potato (<i>Ipomoea batatas</i> (L.) Lam) under the Prayagraj region of India" is a very useful research that analyses the impact of the economic valuation of different sweet potato varieties in the Prayagraj region of India.</p> <p>The paper is important for the scientific community, but also for practitioners because it helps to design directions of action in research and practice, in particular, regarding the impact of economic evaluation of different varieties of sweet potatoes in the Prayagraj region of India.</p> <p>I mention that the topic is of great importance because in the research carried out it has been shown that many opportunities are offered for growth, development and improvement of businesses, including as a result of the economic evaluation of different varieties of sweet potatoes in the Prayagraj region of India. Analysing the impact of the influence of integration, agility and innovation in the supply chain on the performance of potato growers can result in business development opportunities in this area.</p> <p>The title of the paper is appropriate to the research carried out because the paper details the aspects related to the impact of the economic evaluation of different varieties of sweet potatoes in the Prayagraj region of India.</p> <p>The abstract of the paper presents the important elements of the research carried out, which mainly concern the factors that influence the impact of the influence of integration, agility and innovation of the supply chain on the performance of the company.</p> <p>We value capacity analysis to identify and design an effective use management strategy of how adaptation strategies influence the impact of economic evaluation of different sweet potato varieties in India's Prayagraj region, especially in terms of cost-benefit ratio.</p> <p>The overall objective of the research focused on an in-depth analysis aimed at studying the determination and investigation of the role of cost-benefit analysis on sweet potato yields of different varieties in the Prayagraj region of India.</p> <p>The research reveals the importance of analysing the factors that influence the performance of the results obtained in terms of determining and investigating the role of integration, agility and innovation of the production chain correlated with the cost benefit analysis, especially to achieve the proposed objectives motivating enough to run and increase business further.</p> <p>The structure of the paper and its subsections are in a sequential sequence and lead to the presentation of research results.</p> <p>I appreciate that research needs to be based, in addition to cost-benefit analysis, on risk behaviour, with the analysis of the impact of innovative, efficient and effective strategies of operations and organizations to preserve their best solutions and the role that policies in the field play in business flows, which requires an adequate approach from a scientific and practical point of view.</p> <p>The study was also based on a series of own analyses based on specialized literature, and during the scientific approach, the opinions of analysts, researchers, experts and professionals in the field were called upon and important approaches from the specific literature in the field, references and appropriate bibliographic sources were indicated.</p> <p>The research was based on appropriate methods of data collection and analysis.</p> <p>Therefore, the research carried out is important because it reveals that it contributes significantly to the field of knowledge through how the impact of cost-benefit analysis has on producers' decisions, but also on the influence of supply chain integration, agility and innovation on farmers' and traders' performance. The concepts are particularly significant because they underline how important it is to perceive research and continuously review advances in research-specific practices in the context of increasing global demand for the potential of aggregation based on determining and investigating the role of supply chain integration, agility and innovation in the performance of companies in the agricultural and food sectors.</p> <p>We believe that it is important to have a risk behaviour but also to analyse the impact of innovative, efficient and effective strategies of operations and organizations in order to preserve the best solutions and the role that policies in the field play. This helps to support the increase in business efficiency, their inherent sustainability and harmony, in particular to ensure the</p>
