

**Editor's Comment:**

I have gone through the original manuscript, reviewer comments and suggestions and revised manuscript of a research paper entitled "Effects of Organic and Inorganic fertilizers on the growth and yield of Rice (*Oryza sativa* L.)" submitted to Asian Soil Research Journal . The paper is well written with sufficient data and their statistical analysis which will be more useful for both farmers and scientific communities.

**Observations:**

01) The results of submitted paper will be more useful to rice growing farmers to maintain soil health by minimizing chemical fertilizers.

02) The paper would encourage the scientific community to take further study to develop more technologies for adopting organic farming.

03) The paper contains good information related to organic manure which will certainly help those who want to go for organic farming.

Final Decision: The manuscript should be accepted for publication in Asian Soil Research Journal.
