Journal Name:	<b>Archives of Current Research International</b>
Manuscript Number:	<b>Ms_ACRI_115288</b>
Title of the Manuscript:	<b>IMMUNOGLOBULIN BASED THERAPEUTIC APPROACH FOR PARVO VIRUS INFECTION IN DOG - A CASE REPORT</b>
Type of the Article	

**PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</b>
<p><b>Compulsory</b> REVISION comments</p> <p>1. <b>Is the manuscript important for scientific community?</b> (Please write few sentences on this manuscript)</p> <p>2. <b>Is the title of the article suitable?</b> (If not please suggest an alternative title)</p> <p>3. <b>Is the abstract of the article comprehensive?</b></p> <p>4. <b>Are subsections and structure of the manuscript appropriate?</b></p> <p>5. <b>Do you think the manuscript is scientifically correct?</b></p> <p>6. <b>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b></p> <p><b>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</b></p>	<p>1. The publication adds value to the scientific community by offering a case report of a new therapeutic method for canine parvovirus infection, improving our understanding and management of this important veterinary disease.</p> <p>2. The title is appropriate, however, it can be modified to "Managing Canine Parvovirus Infection with Immunoglobulin Therapy: A Case Report"</p> <p>3. The abstract needs to also briefly describe the findings obtained during the treatment period, as well as any follow-up assessments undertaken to determine the therapy's long-term success. Additionally, including a comment on the findings' significance for clinical practice or future study could help to improve the abstract.</p> <p>4. Overall, the structure of the manuscript is appropriate</p> <p>5. Its is scientifically correct, however, the following can make it good; The accuracy and reliability of diagnostic techniques, such as the fast antigen test, are critical for confirming canine parvovirus infection. Elucidating the scientific basis for the efficacy of immunoglobulin therapy in canine parvovirus infection, including explaining mechanisms of action, would improve the treatment strategy. Including information regarding the course of clinical signs, laboratory measurements, and any follow-up assessments would allow for a more comprehensive evaluation of therapy efficacy, bolstering the manuscript's scientific legitimacy.</p> <p>6. They are sufficient references</p>	
<p><b>Minor</b> REVISION comments</p> <p>1. <b>Is language/English quality of the article suitable for scholarly communications?</b></p>	<p>Overall, the linguistic quality of the text appears adequate for scientific communication in the veterinary area.</p>	
<p><b>Optional/General</b> comments</p>	<p>Overall, this work provides essential information to the veterinary community and should be considered for publication pending further modifications and peer review.</p>	

**PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</b>
<p><b>Are there ethical issues in this manuscript?</b></p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
