

Editor's Comment:

I overlooked the comments of both reviewers and revised manuscripts entitled "Effect of Integrated nutrient management of Chickpea (*Cicer arietinum* L.) under Teak (*Tectonagrandis*) based agroforestry system".

I found the manuscript didn't properly follow the reviewer's instructions. The author didn't put the table number and the given numbers were wrong. Most references were old. There are lots of spacing problems. Haphazardly uses uppercase letters. In the body text, the author mentions figure no. 4.1 to 4.9. But I could not find any figures. Why do they repeatedly use the title of the research inside the body text?

Most importantly, I could not find any objectives (what was the purpose of research) or discussion (explanation of results/findings) in the manuscript.

General comments: Major REVISION is required.
