EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
<p>1. The author didn't put the table number and the given numbers were wrong. Most references were old. There are lots of spacing problems. Haphazardly uses uppercase letters. In the body text, the author mentions figure no. 4.1 to 4.9. But I could not find any figures. Why do they repeatedly use the title of the research inside the body text?</p> <p>2. Most importantly, I could not find any objectives (what was the purpose of research) or discussion (explanation of results/findings) in the manuscript.</p>	<p>I have removed the table no. as it is showed as per the topic means if plant height then just below there is data of plant height and as it is followed. Other correction I have done please check and let me know.</p> <p>I have added the Objectives and the results and discussion are combined.</p>
