PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Based on the initial evaluation, the manuscript seemed to be appropriate and within acceptable standards of writing a manuscript. However, there are some issues and concerns that need to be addressed accordingly.</p> <ol style="list-style-type: none"> 1) Title. Instead of "Discharging" the proponent(s) should use "Implementing" for a more formal writing. 2) Abstract. Please consider revising the research design into mix-methods since the paper has two major components of research. Also, specify the period that the study took place and end. Discuss briefly the data analysis process as well. The keywords should be at least 4-6 words/ terms 3) Introduction. The introduction should also consider looking into the global aspects of the terms or variables involved in the study. At the end of the Introduction, please discuss the research gap found in the review of literature and provide another discussion for the contribution of the study to the field. 4) Methodology. Please provide a discussion for the research design (mixed-method) in order for other researchers to replicate in the future. For the participants, please discuss the inclusion and exclusion criteria. Lastly, provide another subsection for the Data Analysis, discussing how the quantitative and qualitative data were analyzed. 5) Conclusion and Recommendation. Please separate this two sections. Also discuss the limitations of the study in the recommendation part. 	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	The language used is acceptable and understandable.	
<p>Optional/General comments</p>		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
