

Editor's Comment:

I have seen all the files referring to the Work JERR 115216, with the title in the first version as "Multi-feature learning adaptive underwater image enhancement network", and in the second version as "Multi-feature learning adaptive network for underwater image enhancement". I consider that the authors have satisfactorily corrected each and every one of the points made by the referees.

Therefore, I think that the article can already be published in its version.
