

Editor's Comment:

"THE EFFECTS OF SAVINGS MOBILIZATION EFFORTS OF NIGERIAN MONEY MARKET ON ECONOMIC GROWTH" is a surprisingly interesting text considering it is written by rookies. In fact, it is written clearly, is quite detailed (perhaps a little too much), and is scientific sound. The construction of the model is justified in detail, and well supported in reality and in appropriate literature. The very good work of the reviewers was essential for improving the presentation (in this case, a detail to correct: Instead of 5.0 CONCLUSIONS and 5.0 RECOMMENDATIONS it should be 5. CONCLUSIONS and 6.RECOMMENDATIONS). Having said that, and given that the subject covered in this manuscript is of obvious importance, I strongly recommend its publication in AJPAS, after making the small corrections suggested above.
