

Editor's Comment:

The first sentence of the abstract "The present investigation was conducted at Section of Animal Husbandry and Dairy Science, College of Agriculture, Nagpur (Dr. PDKV, Akola) during 2022-2023." should be moved to the section of "Materials and Methods". The sentence "This superiority was found due to the addition of 6.0% betel vine leaves extract in shrikhand." from the abstract should be omitted. There are some grammatical mistakes in the abstract that need to be corrected.

The "Objective" part should be merged with "Introduction". "List 1 : Treatment Details" should be changed to "Figure-1: Flow chart for preparation of cow milk shrikhand blended with Calcutta betel vine (Piper betel) leaves extract." and the top sentence of it is no longer required. A title is required for the "Table" and the sentences below "Table" should be rewritten. How were the mean scores calculated? The mean score calculation procedure must be explained in the "Materials and Methods" section.

Figure-1 and Table-1 should also be cited properly in the manuscript.

After these corrections, the manuscript may be published in JABB.
