| Manuscript Number: | Ms_AJEBA_114760 |
| Title of the Manuscript: | Risks in AGRIGULF's Agricultural Export Settlement Business and Its Management |
| Type of the Article | |

PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|---|---|---|
| <p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> Is the manuscript important for scientific community? (Please write few sentences on this manuscript) Is the title of the article suitable? (If not please suggest an alternative title) Is the abstract of the article comprehensive? Are subsections and structure of the manuscript appropriate? Do you think the manuscript is scientifically correct? Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p> | <ol style="list-style-type: none"> The manuscript is quite important for scientific studies, but the narrative that is built is not accompanied by references For example, this article does not show references With the steady progress of the structural reform of the agricultural supply side, the quality of China's agricultural products continues to improve, the scale of the market continues to expand, the competitiveness of the international market continues to increase, and has become the world's second-largest agricultural products trading country. With the continuous development of international trade in agricultural products, international settlement as one of the key links in international trade, export settlement has been rapidly developed, but also faces a serious test: on the one hand, from the point of view of the complexity of the international settlement itself, due to the international settlement business into the Chinese market at a late date, the development of the initial stage, compared with the traditional large-scale enterprises, small and medium-sized enterprises can not get rid of the constraints of the external macro-environment. The title of the article is in accordance with the objectives to be achieved The abstract has not been fully explained, the type of research used, the samples/informants used, the research methods and results have not been explained The subsections and structure of the manuscript are incomplete, do not explain the research methods and results and discussion. What I understand is that this article is more of the author's opinion and more like writing in a newspaper. The manuscript is not scientifically correct, because it does not explain the scientific method and there is no previous research that can be used as a reference The references are quite up to date, but there are no references that can be built and used as a basis for determining research objectives | |
| <p>Minor REVISION comments</p> <ol style="list-style-type: none"> Is language/English quality of the article suitable for scholarly communications? | In terms of English, this article is suitable for scientific study | |
| <p>Optional/General comments</p> | | |
