	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1. Tuberculous pericarditis is a common location of extrapulmonary tuberculosis. the interest of this article lies solely in recalling and talking about new developments in patient care</p> <p>2. Yes, the title of the article is appropriate</p> <p>3. Yes, the title of the article is comprehensive.</p> <p>4. For the form, there are some recommendations that we can make: see (author's comment section)</p> <p>5. The manuscript is scientifically correct.</p> <p>6. I think we can put even more references in the text.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>I' am not a native English speaker, it is difficult for me to judge the quality of the English language in the article.</p>	
<p>Optional/General comments</p>	<ul style="list-style-type: none"> ➤ The corrections that can be made to the structure of the manuscript are: <ul style="list-style-type: none"> - The title page must include the title of the manuscript in French and English - It is better to devote one page to structured French and English summaries. - Also insert 5 key words in French and English. - For the article itself, we devote a page to the introduction, a few pages to the clinical case and the discussion, and a final page to the conclusion. ➤ concerning the substance, it was necessary to follow a narrative style in the discussion chapter, reporting the important points of the field, the disease, its diagnosis, its treatment and its evolution, avoiding unnecessary details like this chapter which can be replaced by a reference to the ESC 2015 guideline. ➤ To avoid cluttering the text with details, we can use more references to enrich the text and to remain concise in the writing. ➤ The research done by Rooney et al. must be referenced (introduction) 	
	<p>there are typing errors that need to be corrected, and which do not affect the content of the article (they were highlighted in the manuscript).</p>
