<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> Is the manuscript important for scientific community? (Please write few sentences on this manuscript) Is the title of the article suitable? (If not please suggest an alternative title) Is the abstract of the article comprehensive? Are subsections and structure of the manuscript appropriate? Do you think the manuscript is scientifically correct? Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>The article is written in a traditional style and contains all the chapters. Modern hematological, biochemical, histomorphological and statistical research methods were used. The results obtained are presented specifically using tabular materials and drawings. Based on the results obtained, the authors concisely state the conclusion.</p> <p>However, it is not sufficiently substantiated for the claim that tomato paste "GINO" (canned) allows the restoration of the functional state of the liver. This requires additional experimental studies in laboratory animals with acute toxic hepatitis. Further, the article argues that a decrease in AST is not an indicator of the permeability of hepatocyte membranes, but of cardiomyocytes.</p> <p>After conducting additional experimental studies, the article may be recommended for publication in the Asian Journal of Hematology Research.</p>	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> Is language/English quality of the article suitable for scholarly communications?
