

Review Form 3

Journal Name:	Biotechnology Journal International
Manuscript Number:	Ms_BJI_120685
Title of the Manuscript:	Impact of Different Extraction Processes on the Quality of Shea Butter (<i>Vitellaria paradoxa</i>) Produced by Women in the Northern Regions of Côte d'Ivoire
Type of the Article	Original Research Article

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write few sentences regarding the importance this manuscript for scientific community. Why do you like (or dislike) this manuscript? Minimum 3-4 sentences may be required for this part.	The manuscript has lot of significance for economic development of the study area . I like the presentation and observations of the manuscript and appreciate and congratulate all the authors and would like to consider this original research work for publication.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest addition (or deletion) of some points in this section? Please write your suggestions here.	Yes	
Are subsections and structure of the manuscript appropriate?	Yes	
Please write few sentences regarding the scientific correctness of this manuscript. Why do think that this manuscript is scientifically robust and technically sound? Minimum 3-4 sentences may be required for this part.	The manuscript is scientifically robust and technically sound as the locals are giving value addition to the bio resources for economic and sustainable development through innovative techniques. Best study for Women empowerment and development.	
Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.	Yes	
<u>Minor</u> REVISION comments Is language/English quality of the article suitable for scholarly communications?	Yes	
Optional/General comments	It has been observed during the present study that traditional methods may preserve more of the natural qualities and community cohesion; modern mechanical extraction can offer efficiency and consistency. The choice of extraction method should consider both quality factors and socio-economic impacts on the communities involved in Shea butter production in Northern Côte d'Ivoire. Excellent piece of work done by authors after deep investigation published the data and it will help a lot for economic and sustainable development.
