

Review Form 3

Journal Name:	Journal of Advances in Medicine and Medical Research
Manuscript Number:	Ms_JAMMR_120289
Title of the Manuscript:	Comparison of postoperative analgesia between a femoral nerve block with local infiltration analgesia and a suprainguinal fascia iliaca compartment block with local infiltration analgesia after total hip arthroplasty: A prospective, randomized trial
Type of the Article	Original Research Article

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write few sentences regarding the importance this manuscript for scientific community. Why do you like (or dislike) this manuscript? Minimum 3-4 sentences may be required for this part.	<ol style="list-style-type: none"> 1. This is a commonly performed surgery and they have compared the commonly used interventions for analgesia. 2. This study would provide an insight about the pain management after total hip arthroplasty surgeries. 	
Is the title of the article suitable? (If not please suggest an alternative title)	Kindly mention it is an open label study in the title also.	
Is the abstract of the article comprehensive? Do you suggest addition (or deletion) of some points in this section? Please write your suggestions here.	No changes required in abstract	
Are subsections and structure of the manuscript appropriate?	Yes	
Please write few sentences regarding the scientific correctness of this manuscript. Why do think that this manuscript is scientifically robust and technically sound? Minimum 3-4 sentences may be required for this part.	This is a well planned study although having a few shortcomings as this is an open label trial. All the necessary ethical approval is taken. Study conduct is following the principle of declaration of Helsinki. However, clinical registry trial is missing. Kindly mention the clinical registration trial number.	
Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.	Remove older references like reference number 5,11 as they are older than 10 years. Total 15 references are sufficient.	
Minor REVISION comments		
Is language/English quality of the article suitable for scholarly communications?	Yes	
Optional/General comments	<ol style="list-style-type: none"> 1. Since it is an open label trial, how have you avoided bias? 2. How will you explain the intraoperative fluid balance difference and what inference can be derived from this finding?
