Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<ol style="list-style-type: none"> 1. Manuscript holds significant scientific merit as mustard farming holds an important role in the economic growth in the study region. 2. There seems a lack of thought in the article title. I would like to suggest an alternative title: "Feasibility And Economic Growth Rate of Mustard Farming In Uttar Pradesh (U.P.) And Bundelkhand Region" 3. Abstract is comprehensive enough. Though I suggest to spell out abbreviations i.e. CAGR, CACP Keywords are excessive. Just choose few most important keywords. Do not include in keywords already seen in article title. Suggested keywords: "Coefficient of variation, CACP, Cost concept, Mustard, Instability" 4. I suggest to tone down colors of the figures (Graphs) used, better choose neutral colors rather than the bright stark ones. Arrange tables in a way that it will not be break between page for ease of viewing data results. A whole table should fit a page for discussion. Data presented were substantial but was not discussed thoroughly and comprehensively. Discussion consists of descriptive information which could be accounted from the table and figures already. There were a lack of implication and comparison to previous similar studies/literatures. I suggest for revision specifically focusing on bulking up comprehensive discussions with implications to the region. 5. Yes. Findings presented has scientific merit and is correct though it lacks comprehensive values. 6. Partially. I suggest comprehensive comparison of current data findings from previous similar studies. Please find most recent literatures and discuss implications to the industry of the crop of interest. 	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> 1. Is language/English quality of the article suitable for scholarly communications? 	<ol style="list-style-type: none"> 1. Yes, the article's language and English quality are suitable enough for scholarly communications. 	
<p>Optional/General comments</p>
