

Review Form 3

Journal Name:	Asian Hematology Research Journal
Manuscript Number:	Ms_AHRJ_120945
Title of the Manuscript:	The relationship between the ABO type, Rh factor and the 2D:4D ratio: A cross-sectional study in Ghana
Type of the Article	Double anonymized

Review Form 3

PART 1: Review Comments

<u>Compulsory</u> REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<p>Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.</p>	<p>Investigates the intriguing connection between genetic markers and physical traits. This study could provide valuable insights into how blood group types and Rh factors may influence particularly through the 2D:4D ratio. I find this manuscript particularly compelling due to its interdisciplinary approach, combining elements of genetics, developmental biology, and anthropometry, potentially paving the way for new research directions and a deeper understanding of human biological variation.</p>	
<p>Is the title of the article suitable? (If not please suggest an alternative title)</p>	<p>Yes</p>	
<p>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</p>	<p>Good</p>	
<p>Are subsections and structure of the manuscript appropriate?</p>	<p>Yes</p>	
<p>Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.</p>	<p>Its comprehensive methodology and rigorous statistical analysis. The study employs a well-defined cross-sectional design, ensuring a representative sample. Additionally, the use of precise measurement techniques for the 2D:4D ratio and accurate determination of ABO and Rh blood types enhances the reliability of the findings. The manuscript's thorough data analysis and adherence to scientific standards suggest that its conclusions are both credible and valuable to the scientific community.</p>	
<p>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</p>	<p>Enough references</p>	
<p><u>Minor</u> REVISION comments</p> <p>Is the language/English quality of the article suitable for scholarly communications?</p>	<p>Suitable for scholarly communication</p>	
<p><u>Optional/General</u> comments</p>	<p>Good study</p>
