

## Review Form 1.7

Journal Name:	Asian Journal of Chemical Sciences
Manuscript Number:	Ms_AJOCS_119598
Title of the Manuscript:	Structural and Potential Biological Properties of SBDTC and SMDTC Containing Metal Complexes: A Brief Review
Type of the Article	Review Article

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments  1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)  2. Is the title of the article suitable? (If not please suggest an alternative title)  3. Is the abstract of the article comprehensive?  4. Are subsections and structure of the manuscript appropriate?  5. Do you think the manuscript is scientifically correct?  6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.  <u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u>	  1. Yes. The Ms entitled ' Structural and Potential Biological Properties of SBDTC and SMDTC Containing Metal Complexes: A Brief Review ' is important as its main focus is upon overall review of structural and biological properties of two well-known dithiocarbazates. The Ms thoroughly covers the applications of these two molecules along with the future scope in synthesis and biological significance of them.  2. Yes.  3. Yes.  4. Yes.  5. Yes.  6. Yes.	
<b>Minor</b> REVISION comments  1. Is language/English quality of the article suitable for scholarly communications?	Yes. *Two minor corrections are suggested; i) Line 30; functional group mentioned in bracket (-NCS <sub>2</sub> R) need to be written correctly. li) Line 33 and 34; The sentence 'Di-thiocarbazate and its substituted derivatives have become promising interest in the past few decades' should be written as 'Di-thiocarbazate and its substituted derivatives have become promising molecules of interest in the past few decades'	
<b>Optional/General</b> comments		

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
