Title of the Manuscript:	Potential of gridded precipitation estimate products for hydrological modelling: The case of small watersheds in Côte d'Ivoire.
Type of the Article	

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>Yes, the manuscript is important for the scientific community because it identified the most performing source of precipitation data for hydrological modelling of streamflow in the study area, where the ground observations are unavailable.</p> <p>Yes, the title of the article is suitable</p> <p>The abstract of the article is not comprehensive as the problem statement was not well defined and the results were not properly reported.</p> <p>The subsections and structure of the manuscript are not appropriate. However, corrections have been provided in the manuscript. Yes, the manuscript is scientifically correct.</p> <p>The references cited are sufficient but the most recent is lacking as the coverage is between 2003 and 2021. There are many very recent papers on this topic for vital information which can assist in improving the quality of the paper.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>The quality of the English used needs to be improved, as some technical terms are lacking.</p>	
<p>Optional/General comments</p>	<p>The authors need to be consistent in the use of terms. For example, gridded precipitation estimates products, satellite-based products, and satellite rainfall estimates.</p>
