<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Yes</p>	
<p>Optional/General comments</p>	<ul style="list-style-type: none"> • The abstract should be more informative, First, briefly state the research topic and questions. • Then, using the primary studies in the literature you reviewed, include the participants in the studies and the main results. • Then include the conclusion of your literature review. <p>The introduction The abbreviation should be explained when they are first mentioned in the text. You should mention a reference after each important sentence, for example (Diabetes patients experience anemia twice as frequently as non-diabetics). Inaccurate information (In diabetes, microvascular complications are the main cause of death rather than cardiovascular disease) its macrovascular complication is the major cause of death. Many paragraphs need rephrasing. Many editing problems. No sufficient studies to support your review. Problem with delivering the information.</p>
