

**Review Form 3**

Journal Name:	<b>Advances in Research</b>
Manuscript Number:	<b>Ms_AIR_120498</b>
Title of the Manuscript:	<b>Molecular diagnosis of <i>Mycoplasma haemofelis</i> and 'Candidatus <i>Mycoplasma haemominutum</i>' in domestic feline, case report</b>
Type of the Article	<b>Case report</b>

**Review Form 3**

**PART 1: Review Comments**

<b>Compulsory</b> REVISION comments	<b>Reviewer's comment</b>	<b>Author's Feedback</b> (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Please write few sentences regarding the importance this manuscript for scientific community. Why do you like (or dislike) this manuscript? Minimum 3-4 sentences may be required for this part.</b></p>		
<p><b>Is the title of the article suitable? (If not please suggest an alternative title)</b></p>		
<p><b>Is the abstract of the article comprehensive? Do you suggest addition (or deletion) of some points in this section? Please write your suggestions here.</b></p>		
<p><b>Are subsections and structure of the manuscript appropriate?</b></p>		
<p><b>Please write few sentences regarding the scientific correctness of this manuscript. Why do think that this manuscript is scientifically robust and technically sound? Minimum 3-4 sentences may be required for this part.</b></p>		
<p><b>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b></p>		
<p>Minor REVISION comments</p> <p><b>Is language/English quality of the article suitable for scholarly communications?</b></p>		
<p><b>Optional/General</b> comments</p>	<p>Genetic-based tests used in diagnosis and treatment do not diagnose the disease. They detect existing bacterial or viral nucleic acid. Because ;</p> <p>1- A positive nucleic acid test does not mean that there is a disease;</p> <p>2- It should be taken into consideration that bacteria may cross-react with other bacterial species within the same species.</p> <p>3- It should not be forgotten that nucleic acids found on the surfaces that the animals studied and the surfaces they come into contact with may cause false positivity. Therefore, it is recommended to include them in the publication (at least in the discussion section). Thank you for your effort and effort.</p>	

### Review Form 3

#### **PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment</b> <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
