Manuscript Number:	Ms_AJMAH_120240
Title of the Manuscript:	The Relationship of Tofu Coagulants and Irritant Contact Dermatitis in Tofu Maker at Serang Banten Indonesia
Type of the Article	

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write few sentences regarding the importance this manuscript for scientific community. Why do you like (or dislike) this manuscript? Minimum 3-4 sentences may be required for this part.	Manuscript is important and likeable as it will enlighten about health hazards caused due to handling tofu. This study will also help to reveal causative factors responsible for irritant contact dermatitis and hence will help in preventing it suitably.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes title is appropriate as it defines the study in short.	
Is the abstract of the article comprehensive? Do you suggest addition (or deletion) of some points in this section? Please write your suggestions here.	Although comprehensive, the abstract can also include the incidence of ICD in relation to PPE so that one can understand the use of protective equipment in cases of ICD." The chi-square data analysis revealed that exposure to tofu coagulants is a protective factor for ICD, with a p-value of less than 0.001 and an odds ratio of 0.164." Please correct it is a causative factor instead of protective.	
Are subsections and structure of the manuscript appropriate?	Please include heading of Abbreviation. The author can include headings of Study site, study duration, sample size for easy readability of the article. Also include heading of funding and acknowledgement.	
Please write few sentences regarding the scientific correctness of this manuscript. Why do think that this manuscript is scientifically robust and technically sound? Minimum 3-4 sentences may be required for this part.	It adheres to established scientific methods and principles in studying the relationship between tofu coagulants and dermatitis. The research design, methodology, and statistical analysis are robust and appropriate for drawing reliable conclusions. Furthermore, the manuscript accurately report findings and interpretations supported by the data collected from tofu makers in Serang, Banten, Indonesia. Finally, the conclusion is grounded in the results obtained, contributing meaningfully to the understanding of potential health risks associated with specific tofu production practices.	
Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.	References are not in proper format please correct it. All references should come under heading of references and one should avoid mentioning heading in text in bracket. Please correct.	
Minor REVISION comments		
Is language/English quality of the article suitable for scholarly communications?	Although readable some grammatical errors are present . Please correct.	
Optional/General comments	Article will enhance knowledge about the factors responsible for ICD hence also its prevention. Avoid using same abbreviation for different full forms. Eg- ICD – Irritant Contact Dermatitis or ICD- industrial contact dermatitis. Please correct.
