

**Review Form 3**

Journal Name:	<b>European Journal of Medicinal Plants</b>
Manuscript Number:	<b>Ms_EJMP_120525</b>
Title of the Manuscript:	<b>Natural Fibres Innovations in Medical Textiles</b>
Type of the Article	

**Review Form 3**

**PART 1: Review Comments**

<b>Compulsory</b> REVISION comments	<b>Reviewer's comment</b>	<b>Author's Feedback</b> (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write few sentences regarding the importance this manuscript for scientific community. Why do you like (or dislike) this manuscript? Minimum 3-4 sentences may be required for this part.	The study in this domain is important as with the rising temperatures and different diseases, such fibres could be an effective solution. Banyan Fibre, Kenaf Fibre, and Sisal Fibre could not only be sustainable materials but also with the right processing more operational.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title is suitable for the concerned article.	
Is the abstract of the article comprehensive? Do you suggest addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract of the paper emphasizes on the importance of natural fibres used for different medical remedies and important cure. The scholar has also mentioned the aim and the purpose of the study. However, the research methodology and the research tools could be more clearly mentioned, so that the parameters of the study could be clearly identified.	
Are subsections and structure of the manuscript appropriate?	The structure of the manuscript is fine.	
Please write few sentences regarding the scientific correctness of this manuscript. Why do think that this manuscript is scientifically robust and technically sound? Minimum 3-4 sentences may be required for this part.	Engaging with nature through scientific exploration can benefit conservation efforts and improve public understanding of environmental issues. The scholar has given a table of the nature and the output of the fibers that could determine their further usage. Thus establishing a cause and effect relation to these materials so that they could be further used accordingly in curing.	
Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.	Although the writer has given enough evidence, however it would be helpful for the reader if more references in terms of its processing or by-products could also be added in the conclusion.	
<b>Minor</b> REVISION comments  Is language/English quality of the article suitable for scholarly communications?	The language is appropriate for scholarly writing.	
<b>Optional/General</b> comments	Although the research has been elaborately done but some interviews or focal group study could add more perspective to this study.	

**PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
