

Editor's Comment:

You can accept manuscript number: 2024/IJPSS/119812. However review the referencing style to conform to standards of the journal. For example the numbering should be logical. E.g. on page 2 (V1 version) you cant move from reference 2 then to 15. It should be followed by 3. Reference 15 should probably be reference 3. Figures 1 and 2 are not informative to me. Give a detailed title to clearly bring out what you want to display or show as differences between the two. Finally these Figures should be connected to text.
