

**Review Form 3**

Journal Name:	<b>Journal of Experimental Agriculture International</b>
Manuscript Number:	<b>Ms_JEAI_120674</b>
Title of the Manuscript:	<b>IN-VITRO AND IN-VIVO MANAGEMENT OF SEED BORNE FUNGAL DISEASES OF MAIZE.</b>
Type of the Article	<b>Original Research Article</b>

### Review Form 3

#### PART 1: Review Comments

<b>Compulsory</b> REVISION comments	<b>Reviewer's comment</b>	<b>Author's Feedback</b> (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Please write few sentences regarding the importance this manuscript for scientific community. Why do you like (or dislike) this manuscript? Minimum 3-4 sentences may be required for this part.</b>	As per the results it shows that by using bio agents tested <i>Pseudomonas fluorescens</i> @ 10 g/ kg of seeds recorded highest germination per cent by its various mode of action. In the field the seed treatment with mancozeb 50% + carbendazim 25% WS @ 2 g/kg seeds better performance in reducing the disease severity there by increasing the yield and shelling percentage. It's useful for agriculture process as well as increasing the yield of products.	
<b>Is the title of the article suitable? (If not please suggest an alternative title)</b>		
<b>Is the abstract of the article comprehensive? Do you suggest addition (or deletion) of some points in this section? Please write your suggestions here.</b>	YES	
<b>Are subsections and structure of the manuscript appropriate?</b>	Yes , The structure of the manuscript is correlated with result and discussion .	
<b>Please write few sentences regarding the scientific correctness of this manuscript. Why do think that this manuscript is scientifically robust and technically sound? Minimum 3-4 sentences may be required for this part.</b>	Seed is the most crucial and vital component in crop production. The seed material used for sowing has a big impact on crop performance. The seed treatment with mancozeb + carbendazim recorded the highest per cent seed germination and seedling. Major role in plant growth promotion by production of wide spectrum of bioactive metabolites and induce systematic resistance. It's helpful for choosing right seed for Agriculture .	
<b>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b>	YES	
<b>Minor</b> REVISION comments		
<b>Is language/English quality of the article suitable for scholarly communications?</b>	YES	
<b>Optional/General</b> comments		

#### PART 2:

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
