

## Review Form 1.7

Journal Name:	European Journal of Nutrition & Food Safety
Manuscript Number:	Ms_EJNFS_118280
Title of the Manuscript:	The Role of Food Science in Combating Obesity and Related Metabolic Disorders
Type of the Article	Review

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Compulsory REVISION</b> comments</p> <ol style="list-style-type: none"> <li><b>Is the manuscript important for scientific community?</b> (Please write few sentences on this manuscript)</li> <li><b>Is the title of the article suitable?</b> (If not please suggest an alternative title)</li> <li><b>Is the abstract of the article comprehensive?</b></li> <li><b>Are subsections and structure of the manuscript appropriate?</b></li> <li><b>Do you think the manuscript is scientifically correct?</b></li> <li><b>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b></li> </ol> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<ol style="list-style-type: none"> <li>It is, as food and nutrition are the talk of town these days with every age group more aware and working towards a better body and mind, both of which are connected to food intake. This article describes in detail factors related to food from functional ingredients to processing and advancements.</li> <li>Acceptable.</li> <li>Please avoid repetitive mention of "obesity and related metabolic disorders"</li> <li>As this is a review article, the headings are okay. However, the author needs to mention from where they reviewed the articles for example pub med, science direct, google scholar, etc. Can the author add review from original articles as well? Instead of only the case reports. And even if only case reports are reviewed, separate heading and further sub headings are unnecessary.</li> <li>Scientifically, yes. Nevertheless, the author is requested to please mention what are the other metabolic disorders with brief description.</li> <li>Up-to-date and valid references.</li> </ol>	
<p><b>Minor REVISION</b> comments</p> <ol style="list-style-type: none"> <li><b>Is language/English quality of the article suitable for scholarly communications?</b></li> </ol>	Yes, manuscript is well written.	
<p><b>Optional/General</b> comments</p>	<p>Overall, this is a strong manuscript. However, in the case reports section, each new report begins with the first sentence mentioning partnership. That is bringing monotony to the writing. Please change that. You can simply mention how things went about in different reports, and occasionally mentioning who partnered/collaborated with whom for the research.</p> <p>Please correct any spelling mistakes, most of the corrections are only British vs American English style.</p> <p>Figures 2, 3 and 5, may be omitted from the manuscript.</p>
