Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?		
Optional/General comments	I think that this article needs some modification as there is a defect in using the accurate terms and which lesion that was malignant, the upper or the lower. Also the author should differentiate between colon and rectal cancer as the management is different and also should be accurate in determining the level of the lesion from the anal verge using a rigid sigmoidoscope. My suggested remarks ar included in the attached file
