<p>This has improved to some extent The English needs to be reassessed throughout – the examples given have been adjusted but there are many others that need to be corrected The areas outlined before do not seem to have been addressed: Line 293 – age may be important as younger doctors may have received appropriate training / education, which was not provided for older doctors, this needs to be discussed Line 307 – it is unclear what beliefs are being discussed here The figure of the numbers of participants in the other studies is not needed</p>
