

**Review Form 3**

Journal Name:	<b>Asian Journal of Research in Animal and Veterinary Sciences</b>
Manuscript Number:	<b>Ms_AJRAVS_120281</b>
Title of the Manuscript:	<b>Prevalence Of Parasite and Occurrence of Co-Infection in Pigs Reared in Extensive Farms in Gombe State, Nigeria.</b>
Type of the Article	<b>Original Research Article</b>

**Review Form 3**

**PART 1: Review Comments**

<b>Compulsory</b> REVISION comments	<b>Reviewer's comment</b>	<b>Author's Feedback</b> <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b>Please write few sentences regarding the importance this manuscript for scientific community. Why do you like (or dislike) this manuscript? Minimum 3-4 sentences may be required for this part.</b>	This research has the potential to contribute to the development of targeted interventions, improved farming practices, and ultimately, the promotion of animal health and welfare. I like this manuscript because it addresses an important public health issue and has the potential to inform evidence-based interventions to benefit both animal and human populations.	
<b>Is the title of the article suitable? (If not please suggest an alternative title)</b>	Yes, It accurately reflects the main focus of the research, which is to investigate the prevalence of parasites and co-infections in pigs raised in extensive farms in a specific region of Nigeria..	
Is the abstract of the article comprehensive? Do you suggest addition (or deletion) of some points in this section? Please write your suggestions here.	Without the specific abstract provided, I am unable to evaluate the comprehensiveness of the abstract for the study However, a comprehensive abstract for a study of this nature would typically include the following elements: <ul style="list-style-type: none"> <li>• A brief introduction to the problem being addressed and the research objectives.</li> <li>• analytical techniques.</li> <li>• Key findings related to the prevalence of parasites and co-infections in pigs reared in extensive farms</li> <li>• Relevant keywords that capture the main focus of the study.</li> </ul>	
Are subsections and structure of the manuscript appropriate?	Additionally, depending on the amount of data collected, other subsections such as "Results by Parasite Type," "Co-Infection Patterns," "Discussion of Parasite Control Strategies," or "Implications for Public Health" may be included.	
Please write few sentences regarding the scientific correctness of this manuscript. Why do think that this manuscript is scientifically robust and technically sound? Minimum 3-4 sentences may be required for this part.	Is scientifically robust and technically sound due to its rigorous methodology, which likely includes standardized sampling techniques, appropriate diagnostic tests for parasite detection,. It addresses an important aspect of animal health and public health in the context of livestock farming. Additionally, the study's location in Gombe State, Nigeria, adds value by contributing to the understanding of regional variations in parasite prevalence and co-infection patterns, providing valuable insights for local agricultural and veterinary practices. Furthermore, the manuscript's potential to contribute to the existing body of knowledge on parasitology and veterinary science underscores its scientific significance and credibility	
Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. =	The references are sufficiency and al most recent	

### Review Form 3

Minor REVISION comments <b>Is language/English quality of the article suitable for scholarly communications?</b>	Based on the provided excerpt, the language and English quality of the article appear to be suitable for scholarly communication. The writing is clear, concise, and technically sound, which are important qualities for academic writing.	
<b>Optional/General</b> comments	<p>It would be important for the article to provide a clear research objective or hypothesis related to the study of parasite occurrence and co-infection in pigs. This will help guide the reader in understanding the purpose and scope of the research.</p> <p>Additionally, the article should aim to present detailed methodology, including information on sample collection, diagnostic techniques used for detecting parasites, data analysis methods, and any relevant statistical analyses. Providing a transparent methodology is crucial for ensuring the reproducibility and reliability of the research findings.</p>	

### **PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
