

**Review Form 1.8**

Journal Name:	<b>Journal of Advances in Medicine and Medical Research</b>
Manuscript Number:	<b>Ms_JAMMR_120084</b>
Title of the Manuscript:	<b>Subgrouping Leprosy Patients with Neuropathic Pain in Central Brazil Based on Pain-Related Sensory Abnormalities</b>
Type of the Article	

## Review Form 1.8

### **PART 1: Review Comments**

<b>Compulsory</b> REVISION comments	<b>Reviewer's comment</b>	<b>Author's Feedback</b> <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Is the manuscript important for scientific community? <i>(Please write few sentences regarding this manuscript to justify your answer)</i>	The work is novelty and new concept is more useful for further molecular based on investigations are more useful based the treatment.	
<b>Is the title of the article suitable?</b> (If not please suggest an alternative title)	The manuscript title is suitable for the above study.	
<b>Is the abstract of the article comprehensive?</b>	The manuscript should be condensed as some of its contents are quite extensive. As I said in the section with reviewer remarks.	
<b>Are subsections and structure of the manuscript appropriate?</b>	The subsections and structure of the manuscript appropriate for the overall text parts.	
<b>Do you think the manuscript is scientifically correct?</b> <i>(Please write few sentences regarding this manuscript to justify your answer)</i>	The manuscript is scientifically good and the concept of above title is well plan of investigation.	
<b>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b>	The references are suitable for the manuscript and need some reference related to pain reason for NP cases.	

**Review Form 1.8**

<p><b>Minor</b> REVISION comments</p> <p>Is language/English quality of the article suitable for scholarly communications?</p>	<p>The manuscript is considered for minor revision. The language need improved.</p>	
<p><b>Optional/General</b> comments</p>	<p>The title: Sub grouping Leprosy Patients with Neuropathic Pain in Central Brazil Based on Pain-Related Sensory Abnormalities          The concept of above title is well plan and some queries are included.  <b>Abstract:</b>          1. Reduce the abstract Background          2. Need explanation of pain phenotype profile?          3. How confirmation of neuropathic pain (NP)          4. Need clarification of sub groups.  <b>Patients and methods:</b>          4. Which samples are used to screening the NP using the DN4.          5. Explain the seven positive examinations.          6. Write additional result of Kaiser + meyer – Olkin (KMO)          7. Write the result of Bartlett's test. How the additional results are support of your study.  <b>Result:</b>          8. The author included most patients (64.4%) reported severe Neuropathic Pain occurring before diagnosis and treatment. The questions this type of patients how much percentage of grade disability was scored.          9. Table2, the author mentioned Virchowian. Need definition of Virchowian.          10. The figure 1 needs quality.</p>	

**PART 2:**

	<p><b>Reviewer's comment</b></p>	<p><b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</p>
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
