Manuscript Number:	Ms_ARJGO_121473
Title of the Manuscript:	Urethral Mucosal Prolapse in a Pubertal Girl. A Case Report: Surgical Resection and Repair
Type of the Article	Case report

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	Clinical case reports are one of the first medical scientific texts. Clinical case report or case study (case report) is a tool for publishing new knowledge of practical medicine. Clinical case articles provide an opportunity for clinicians to share their experiences with specific patient challenges and are valuable sources of information and guidance that can be useful to other clinicians when dealing with challenging patients.	
Is the title of the article suitable? (If not please suggest an alternative title)	It is better to mention the type of study which is a case report at the end of the title Surgical Resection and Repair of Prolapse of the urethral mucosa a Pubertal Girl: A Case Report	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	1. Change the title of the background section to aim. After mentioning the purpose of the study, talk about the prevalence of urinary mucosa prolapse and its statistics. In this section, there is no need to mention the case in question. 2. Delete the discussion section completely.	
Are subsections and structure of the manuscript appropriate?	It's suitable.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	Writing case report articles usually does not require extensive research experience and high methodological and statistical knowledge. The reported case contains a clinical educational point for the readers. The article clearly and accurately deals with the main disease and refers to the therapeutic or diagnostic intervention and its consequences.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Almost the number of references is new and sufficient.	
Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	It needs some spelling editing in words and sentences.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
